divisible by
ime) p
, 7, 11, ...

is divisible
by p
ls.

$= \frac{1}{1} = 1$

It is then a pleasant exercise to show that every element in $\mathbb{Q}_7$ is one of

$$\frac{0}{1}, \frac{1}{1}, \frac{2}{1}, \frac{3}{1}, \frac{4}{1}, \frac{5}{1}, \frac{6}{1}$$

i.e. 0, 1, 2, 3, 4, 5, 6.

$\Rightarrow$ modular arithmetic

$$\mathbb{F}_7 = \mathbb{Q}_7 = \mathbb{Z}/7\mathbb{Z}.$$
