

Embedded Files Portfolio

This PDF acts as a self-contained package by embedding three data files in different formats. Click the annotation icons on this page (or use your PDF viewer's attachment panel) to access the files.

Embedded attachments

Filename	MIME type	AFRelationship	Description
invoice.csv	text/csv	Data	Invoice line items
report.xml	application/xml	Data	Monthly sales report
config.json	application/json	Source	Library configuration

API used

Method	Use case
<code>addEmbeddedFile()</code>	Embed a file read from disk.
<code>addContentAsEmbeddedFile()</code>	Embed content generated in memory.
<code>setAnnotation()</code> with Fileattachment subtype	Visible annotation linking to an embedded file.

The *AFRelationship* value categorises each attachment for PDF processors: *Source* = the source that produced this PDF; *Data* = data associated with the PDF.

Attachment Content Preview

invoice.csv (first few lines)

```
item_no,description,qty,unit_price,total
1,"Widget A",10,9.99,99.90
2,"Widget B",5,24.50,122.50
3,"Service Fee",1,150.00,150.00
```

report.xml (excerpt)

```
<report generated="2026-05-01" version="1.0">
  <summary><title>Monthly Sales Report</title></summary>
  <totals>
    <subtotal>372.40</subtotal>
    <total>409.64</total>
  </totals>
</report>
```

config.json (excerpt)

```
{
  "application": "tc-lib-pdf demo",
  "version": "1.0",
  "settings": {
    "compress": true,
    "unicode": true
  }
}
```
