

A box is a Box of positive type ( $\oplus$ )  
An a-box is a Box of negative type ( $\ominus$ )

Then the sum of Zeros is a Zero whose type is the product of the types of the constituents.

Product of types

| $\times$  | $\oplus$  | $\ominus$ |
|-----------|-----------|-----------|
| $\oplus$  | $\oplus$  | $\ominus$ |
| $\ominus$ | $\ominus$ | $\oplus$  |
