

Adolescence the Evolution of a Maverick

- Performed explosive pranks at school with self-built explosives and even tear gas to get back at teachers and bullies. He gets expelled for this at age 14 with bad notes in chemistry, math, and physics.
- Burkhard Heim dreams of becoming a chemist but doesn't want to continue school. He continues to read and study on his own.
- Authored an essay on electron pair formations, which he shows to a professor who sees Heim's potential and convinces him to finish school.
- His parents find a suitable day school, but Heim is bored again. He enrolls in an evening school without telling his parents.
- In the evening school, Heim gets treated as an adult and excels. he even starts an affair with his biology teacher.
- After reading Otto Hahn's paper on nuclear fission, he works on concepts for a nuclear rocket.

A young Burkhard Heim
